

## Seeking a trainee -- New Zealand

We have a 300 ha cropping operation.

Growing many different crops which vary subject to market conditions each year.

Grass seed, corn salad, buckwheat, feed and milling wheat, malting barley, seed multiplication, Canary seed, sunflowers, Hungarian millet, borage, annual clovers, lupins and peas.

Also trading in fattening lambs during our winter.

We are seeking a trainee who is keen to experience arable farming in NZ.

Accommodation is available, we encourage a family environment, sharing our culture and friendly atmosphere.

This is a paid job which will involve all aspects of our farming operation assisting in weed control, crop hygiene, property and machinery maintenance.

Tractor driving assisting in carting seed from field to silo and establishment of autumn sown crops.

Though experience is helpful, its more important to have a keen willingness to learn and energy to work when required. Training will be given.

This is perfect chance to learn of our NZ culture in a friendly family environment as well as getting an opportunity to travel throughout NZ.

Join our extended family which has grown every year since 1998.

With much enthusiasm kind regards

Andrew and Gaewynne

Address:

Avonmore Farm

2509 Methven Highway

6Rd Ashburton 7776

New Zealand
